These prices are on our D. L. & W. and Scranton Coal. Lehigh Coal 25c per ton extra. Tel. 237-21.

## MORSE & JACKSON.

**The Test.**  
Jules Dupree, the French artist, who recently found in Miss Constance Leaming of Wall, Mont., the ideal beauty whom he had set out to search the world for, was talking in New York about America.  
"I have been much impressed in America," he said, "with the dash and strength of your baggage handlers, of baggage smashers, as you justly call them."  
"In Washington one day I pointed out to a baggage smasher a rather frail gripack."  
"Is that gripack strong enough," I said, "to go in the baggage car?"  
"I'll see," said the man.  
"He lifted the grip high above his head and threw it on the ground with all his might."  
"That," he said, "is what she'll get in Philadelphia."  
"He took it up again and banged it against the side of a car four or five times."  
"That is what she'll get in Chicago," he went out.  
"He tossed it high in the air, and on its descent jumped on it, breaking the lock open this time, so that the contents were scattered over the platform."  
"And that's what she'll get in Sioux City," he concluded. "You'd better take her in the Pullman with you, boss, if you're going farther than Sioux City."  
—Indianapolis Star.

## Chew Your Food

No medicine can take the place of teeth. Eat slowly, chew your food thoroughly and keep free from indigestion.  
When haste imposes extra work on the stomach, help it out with

**Beecham's Pills**  
Sold everywhere. In boxes 10c and 25c.

## ONLY ONE

The Record in Barre Is a Unique One.  
If the reader has a "bad back" or any kidney ail and is looking for relief and cure, better depend on the only remedy endorsed by people you know. Doan's Kidney Pills relieve quickly—cure permanently. Barre citizens testify to this. Here is a case of it:

C. A. Churchill, contractor and builder, of 35 Merchant street, Barre, Vt., says: "I recommend Doan's Kidney Pills, which I got from E. A. Drown, druggist, through our Barre newspaper in a statement given eight years ago. I used them at that time and was so greatly benefited that I kept on taking them until the symptoms of kidney complaint and weakness of the back and loins disappeared. It is now as much pleasure to recommend this valuable remedy as it was at the time when they relieved me of my pain and suffering. I have on several occasions used Doan's Kidney Pills since then and always with the same good results. They are certainly worthy of endorsement and I have advised many friends and acquaintances to use them."

For sale by all dealers. Price, 50 cents. Foster-Milburn Co., Buffalo, New York, sole agents for the United States. Remember the name—Doan's and take no other.

## CHELSEA.

Mr. and Mrs. A. W. Whitney went last week to Boston to visit friends and relatives.

Charles Townsend of Barre City spent a portion of last week with his brother, W. P. Townsend.

George Cook of Corinth was in town on business Friday and was accompanied by his mother and sister.

Miss Lyle Tracy of Boston came on Saturday night for a short visit to her parents, Mr. and Mrs. E. O. Tracy.

Lorin Densmore and bride of Boston came last week for a visit to the former's mother, Mrs. Dennis Densmore.

Mr. and Mrs. William R. Sanborn and Rollin Morrill of Stratford were in town Friday and called on their many friends.

W. H. Hill returned Saturday evening from Fair Haven, where he served the agricultural society at starter at their races.

Fred A. Ordway is repairing and making improvements to his residence on Main street in the way of shingling and painting.

Mr. Charles E. Godfrey went last week to Shirley, Mass., to visit relatives and before her return will visit Boston and several other points.

Mr. and Mrs. Lewis Godette of Mechanicville, N. Y., were guests last week at Charles Lyons', as were also Fred Lyons and wife of East Bethel.

Mr. and Mrs. William W. Wilson of Washington were in town Saturday evening on their way home from Boston, and were the guests of their son, Stanley C. Wilson, at the hotel.

Misses Grace and Gertrude Bacon and their brother, Leonard, went on Friday evening to Stratford, where they were the guests Saturday of Rev. and Mrs. A. J. Eastman.

Hale K. Darling was at home from Montpelier over Sunday, returning to Montpelier Monday, where he will be engaged several days longer in the trial of the Massena-Tomas breach of promise case.

Eugene A. Prindle of Barre was in town with real estate agent D. A. Perry, also of Barre, and some parties from Montpelier, Friday, on their way to Vershire to inspect a large tract of land, in view of a deal.

On his return from Lowell recently, Henry Clark brought back twenty head of young Jerseys from the C. I. Hood farm, to be wintered on Mr. Hood's farm here on the West Hill. This installment makes ninety head of cattle that Mr. Hood has here on the farm to be wintered.

Norman B. Davenport, who lives on the Vershire road, has a cane made from olive wood, a native of Asia, which is over 100 years old, having been handed down by father to son from one Basil Davenport, to whom the cane was presented from a lodge of Masons of which he was a member. Mr. Davenport also has a flagonet that is also over a century old and is in a good state of preservation.

## CABOT.

J. B. Knight is reported out of danger.

Dr. Williams returned home Saturday.

Mrs. Rita Walbridge is visiting at Concord, N. H.

Miss Lellie Laird is attending John-Normal school.

Bert Smith lost one of his grey horses Friday night.

W. R. Lance was at home over Sunday from Montpelier.

Rev. F. E. Currier was in Hardwick the first of the week.

Mr. and Mrs. Aron Bolton will go to Jamestown, Saturday.

Luther Town of Barre is here visiting his sister, Mrs. Lyford.

Henry McAllister finished nursing at Laura Adams' Saturday.

L. J. Presson of Hardwick visited at George Hoyt's last week.

J. A. Bailey of Lowell, Mass., is visiting at Charles Howland's.

Lawrence Farrington went to Montpelier for medical treatment.

Mrs. Edwin Foster and friend of Boston are visiting at H. M. Foster's.

H. H. Foster returned from Barre Friday after a week's stay there.

P. F. Whitener, who has been visiting Edson York returned home Friday.

Dr. M. D. Warren returned Friday night from Portland after a week's absence.

William Thomas of Hardwick was here Thursday visiting his sister, Mrs. B. G. Rogers.

J. T. Drew and wife returned Friday night from Waterville, Me., where they have been for a week.

The floor of the cow stable in Ed Smith's barn fell in Thursday night and all the cows went down to the basement.

Mr. and Mrs. Angus Smith went to Sherbrooke fair last week. They will also visit relatives there before they return.

A. V. Nelson, wife and daughter, returned Monday from Payson, after a two weeks' stay with relatives and friends.

TUESDAY, SEPTEMBER 17, 1907.

### No Such Thing.

No one individual can insure himself, for insurance is founded on averages, and there is no such thing as an average of one. 58th year. National Life Insurance company, Montpelier, Vt. (Mutual).

S. S. Ballard, General Agent, Montpelier, N. B. Ballard, Local Agent, Barre, Vt.

### TALK OF THE TOWN.

Masonic charms and pins at L. P. Austin's, "the watch and clock man."

Old gold and silver wanted at refiners' prices in exchange for goods at F. E. Burr's.

Save money by purchasing that tennis racket now. Big reduction at Averill Music Co.

L. P. Austin sells stone cutters' glasses, all kinds and prices from 20c to \$2.00 per pair.

Good-paying hammer handle business for sale. Inquire of M. M. Cook, Barre, Vt. Tel. 427-21.

If you want to invest in real estate that will pay 14 per cent. Inquire of A. A. Smith, Barre, Vt.

The Perry Real Estate agency is offering an especially good trade in a poultry farm near Williamstown. See advertisement.

Italini, chi desiderano Viaggiare sul più sicuro vapore La Provence che lascia New York, Sept. 19 dovessero assennarsi il contratto da Antonio Giachino, Barre, Vt.

If you dearly love to be jollied, don't fail to hear Mr. Jolly of delight on "Jolly Side of Life," under the auspices of the Goddard Athletic association at the Universalist church, Monday, Aug. 18.

The D. A. Perry real estate agency are advertising an especially good trade in a farm with a large amount of wood land within short distance of Graniteville. See adv. in for sale column.

For Sale.—A 70-acre farm situated one mile and a half from this city. Will keep 12 cows and team. Good house, comfortable barn. Has house suitable for 100 hens. An ideal home. Price low. Inquire at once at the D. A. Perry Real Estate agency.

David Belasco's, "The Girl of The Golden West."

David Belasco's use and mystery of the science of lighting effects on a stage is probably more clearly shown in "The Girl of The Golden West," which comes to the opera house on next Friday evening, than in any other production credited to this producer. The fourth act shows a parade at sunrise with the girl and the reformed road agent bound eastward, there to work out their destinies away from old faces and

Scene from David Belasco's Great Play, "The Girl of The Golden West."

old associations. When the curtain rises the time is a few minutes before dawn. The stage is one black, unfathomable mass, the only light being the flaming end of a cigar in the man's mouth. Slowly the darkness becomes fainter and fainter, and then gradually, but in a burst of glory that never fails to evoke an outburst of applause, the sun rises over the tops of the Sierra Nevada mountains in the distance, and its beams, creeping onward, illumine the prairie foot by foot until the little camp of the travelers rests in the full light of the dawn. The effect cannot be adequately described in type. It must be seen to be appreciated. Tickets on sale tonight.

### Health in the Canal Zone.

The high wages paid makes it a mighty temptation to our young artisans to join the force of skilled workmen needed to construct the Panama Canal. Many are restrained, however, by the fear of fevers and malaria. It is the knowing ones—those who have used Electric Bitters, who go there without this fear, well knowing that they are safe from malarious influence with Electric Bitters on hand. Cures blood poisoning, too, biliousness, weakness and stomach, liver and kidney troubles. Guaranteed by the Red Cross Pharmacy, 50c.

### Music Hall.

Miles' brick block has been put in fine shape and is ready to let for dancing parties, meetings and other entertainments. An excellent and safe fire escape has been erected at the rear of the building, with entrance into the Condon block. Orders for the hall will be left at coal office of D. M. Miles, 132 North Main street, in Moore & Owens' store.

### A Brick.

Bertie—Well, mother, I don't care what you say. I think she is a regular brick.  
Mother—Very likely. She certainly seems to be throwing herself at somebody's head.—Funch.

## PORCELAIN FILLING

One of the Dainty Operations in Modern Dentistry

### THE WAY INLAY IS MADE

Fashioned in Fragile Gold Leaf, the Matrix Is Sunk by Vibration in Semi-Fluid Asbestos, and the Mold Filled With Porcelain.

This was an upper front tooth that had once been nicely filled with gold, but fresh decay having set in around that filling it had become necessary to fill the tooth again. This time, the dentist said, he thought he would fill it with porcelain.

All the processes of making a porcelain inlay are interesting. Having drilled the cavity in the tooth to its required depth and shape, the dentist next proceeds to make a matrix of mold of it in gold foil, which he is enabled to do without breaking this delicate material by the use of a bit of sponge between it and the crowding tool. So he crowds the gold foil down around within it everywhere to fit into the cavity perfectly and gets the depth all around the edge of the mold so exactly that the inlay to be made in it when set into place will not only fit perfectly in the cavity, but fit into it with its edges flush all around with the surrounding surface of the tooth.

The mold thus made of the cavity in the tooth may look like the thinnest of tiny gold cups or it may have some irregular shape, according to the shape of the cavity; but, whatever its shape, this mold of gold foil is so slight and thin that a touch would crush it, and it seems judged as if a breath would blow it away, as probably it would, and you may wonder how a solid piece of porcelain can ever be formed in a mold so frail and delicate, but it is all really very simple, as you will see.

Now the dentist takes a small metallic holder about the size and shape of a very small clam shell, which he fills with powdered asbestos mixed with water, and on top of this yielding material, handling it gently with a pair of pliers, he sets the delicate little gold mold, with its closed end down, resting so on the surface of the moistened powdered asbestos. This holder has a lip on one side of its edge, by which it can be lifted with a pair of pliers made for the purpose and serving thus as a handle for it.

Lifting the little holder now by this handle, the operator rubs on the handle very gently, as he might draw a fiddle bow very gently back and forth on the strings of a fiddle. A lead pencil might do for this, but he is likely to use some professional tool with a channeled or engraved handle, whose irregularities will heighten the effect, and, rubbing gently with this on the handle of the holder, he communicates to it and to its contents and to the little gold mold on top continuous, gentle vibrations, which, slight as they are, still cause the mold gradually to settle and imbed itself in the semifluid mass in the holder, and this without in the slightest changing its shape. These vibrations are continued till the mold has settled to the required depth, and then the water is evaporated from the asbestos, and there you have the little gold mold firmly imbedded in practically solid material and ready for use.

The inlay will be made in the mold from a porcelain powder. Porcelain powders for dental use are made by the manufacturers of dental supplies in endless variety of shades, so that it is easily possible to get a powder whose finished product will match any tooth. The dentist has a great assortment of teeth made from porcelain powders, these all named or numbered, and he matches up your tooth with one of these and uses for the inlay the powder of the corresponding number.

With the little gold mold already ready, the operator now mixes a sufficient quantity of the porcelain powder with alcohol to give him the material in a plastic form, while at the same time the alcohol will evaporate quickly. He wets also the asbestos in the mold holder to keep that from absorbing the alcohol in the porcelain powder. And now with his porcelain in workable form he fills the mold with it, to make there the shape that is to be set into the tooth, and then he proceeds to fashion in the plastic material its outward part. This may be simply a slightly rounded surface, for an inlay that is to go into the better part of a tooth, or the inlay may include an edge or corner of a tooth, or both; but, whatever the outward part may be, the operator so molds and fashions it that it will continue and complete naturally the contour of the tooth in which the inlay is to be set.

With the modeling thus finished, the inlay is ready for the final process, and now, with the holder, mold and all, it is put into a tiny electric oven, out of which after a suitable time it is taken, baked into a solid bit of porcelain, the inlay completed.

It is set in place with cement, and so perfectly is porcelain inlaying now done that except upon the closest inspection it may be impossible to tell in an inlay tooth where the natural tooth ends and where the inlay begins, a nice operation in modern dentistry.—Washington Post.

### Tough Forecast.

"Youngling is going to marry the widow Henpeck."  
"Why, she's twice as old as he is."  
"Oh, well, he'll age fast enough after the wedding."—Town and Country.

## Farm, Field and Garden

### A PORTABLE LOADER.

For Handling Corn Shocks, Hay, Lumber and Other Heavy Objects.

A loading device for handling corn shocks adds greatly to the value of the shocker, for with it the corn can be more cheaply handled than by the present methods. One of the first devices of this kind consisted of a long pole or pipe supported on a fulcrum at the rear end of the wagon in such a way as to give considerable leverage. The idea was much like that of the old wall sweep with the semicircular motion added.

An improved loading device which can be carried along with the wagon or left in the field and driven about independently has been invented. It is mounted on four wheels and consists of an adjustable vertical mast on which is a horizontal steel cross arm. On this is mounted a traveling block fitted with pulleys, through which a rope passes. To the end of this rope is attached a horse, which lifts the

CORN SHOCK LOADER, EMPTIED.

load. For loading corn shocks a grapple fork is used, which is slipped under the shock. The grapple arms are closed and with the pull of the horse the shock is lifted up on the wagon and laid on its side or stood on end, the grapple arms being released by simply turning the handle of the fork. This machine was originally designed to load corn shocks, and it easily handles two shocks per minute and will bear a stress of 2,000 pounds. It can also be applied to many other uses on the farm as well as to commercial uses. Among such uses are loading hay, manure, small grain and other heavy objects on the farm, and loading dirt, lumber or telephone poles. Some form of loading device will greatly reduce the hard work on the farm.—C. J. Zintho.

### Alfalfa as a Weed.

It is amusing to see so many easterners trying to grow alfalfa and make a failure of it year after year. Here we are having a time to keep the plants under subjection. It is one of the worst weeds we fruit growers have to contend with. It will get started in our orchards in spite of all we can do, and unless it is chopped out while young it will be almost impossible to keep it down, and not only this, but it will increase a thousandfold in one year. I have a large peach orchard, in which two tons of hay can be cut to the acre three times, making six tons to the acre, all because my place had been leased for three years. When I left this farm there wasn't a spear of alfalfa in it. Now it cuts all this hay. Every seed came into the patch by irrigation water and volunteer. I have as yet noticed no bad effects from it, and it may prove to be a blessing in disguise to the orchard unless it will injure the trees when it is plowed up, as we have to cut it deep in order to kill the immense roots. Sweet clover is another pest we have to contend with, but as it is a biennial plant it is not so hard to get rid of. This latter, under good conditions, grows eight feet high on our rich soils.—G. H. Hoover, Colorado, in Rural New Yorker.

### Fall Sown Oats.

I decidedly favor fall sown oats, said J. W. Mickle before the Texas Corn Growers' association, because—  
The seeding is done at a time when the season is most apt to give a more perfect stand.  
We do not have to sow as much seed per acre.  
They resist cold and drought much better.  
Will mature before being subjected to insects, rust and drought.  
Will mature better heads and heavier grains.  
Will secure the best early market price, and last, but not least, they afford a splendid pasture in winter, which in itself is more than sufficient reason.

### Apples in Boxes.

A western Maryland grower puts apples up in boxes and finds that the cost of three boxes and one barrel is about the same, and by wrapping the apples in paper he finds that one barrel will fill four boxes. These apples sold for the same price per box as could be got for a barrel, thus giving a fine profit for the small extra expense.

### Rat Proof Construction.

Rat proof granaries, corncribs and poultry houses may be constructed by a liberal use of concrete in the foundations and floors.  
Rats, mice and sparrows may be excluded from corncribs by the use of either an inner or an outer covering of fine mesh wire netting sufficiently heavy to resist the teeth of rats.—D. E. Lantz.

### Odd Name For a Mile.

A Burman mile is about equal in length to two English miles. The word for mile in Burmese means "to get," and a mile is the distance that a man goes before he considers it necessary to sit down.
